GAIT POSTURE

www.elsevier.com/locate/gaitpost

Subject index

Volume 23 (2006)

Accidental fall; Musculoskeletal equilibrium; Reaction time; Strength; Biomechanics **23**, 59

Accuracy; Pedar Mobile system; Repeatability; Long-term measurements **23**, 118

Adaptation; Power; Locomotion; Elevated Surface; Kinetics **23**, 268

Age; Coordinate system; 3D; Inverse dynamic **23**, 480

Age effect; Obstructed gait; Joint kinematics; Lower limb; Locomotion **23**, 471

Alignment; Shin splints; Stress fractures; Plantar pressure; Kinematics **23**, 91

Ambulation; Pediatrics; Intersegmental dynamics; Moments **23**, 499

Amplitude; Human movement; Posture; Center of pressure; Variability; Frequency **23**, 173

Angular velocity; Stiffness; Kinematics; Stretch responses; Diplegia **23**, 1

Ankle function; Diabetes; Peripheral neuropathy; Plantar pressure **23**, 464

Ankle plantarflexors; Equinus; Gait; Stroke; Forward dynamic simulation **23**, 32

Asynchrony; Metronome; Synchronisation; Phase shift; Compensation function **23**, 307

Automated methods; Gait analysis; Mutual information; Classification; Feature extraction; Pattern recognition; Data mining; Cerebral palsy; Botulinum Toxin **23**, 331

Back pain; Load carriage; Ergonomics; Spinal motion; Locomotion; Stature change **23**, 133

Balance; COP − COM; Fall prevention; Osteoporosis; Postural sway; Stabilography; Stiffness **23**, 51

Balance; Malignant CNS tumours; Functional status; Gait analysis **23**, 206

Balance; Neuropathy; Quiet stance; Postural perturbation; Spindle group II afferent fibres **23**, 364

Balance; Optic flow; Posture; Postural control; Prediction **23**, 180

Balance; Postural control; Cerebrovascular accident **23**, 249

Balance; Postural control; Development; Sensory organization **23**, 455

Balance; Postural strategy; Fatigue; Perturbation **23**, 348

Balance; Seesaw; Posture; Strategy **23**, 17

Balancing task; Motor learning; Test phase **23**, 9

Bi-articular muscle function; Induced acceleration; Dynamic muscle function **23**, 211

Biomechanics; Accidental fall; Musculoskeletal equilibrium; Reaction time; Strength **23**, 59

Biomechanics; Gait analysis; Data-mining; Toe-walking; Fuzzy c-means **23**, 240

Biomechanics; Gait; Walking; Turning; Kinematics; Kinetics; Limb asymmetries **23**, 106

Biomechanics; Induced acceleration analysis; Computer simulation; Modeling; Coordination; Gait **23**, 37

Biomedical model; Gait; Multi-segment foot; Kinematics; Kinetics; Inverse dynamics; Mediolateral segmentation **23**, 519

Botulinum Toxin; Gait analysis; Automated methods; Mutual information; Classification; Feature extraction; Pattern recognition; Data mining; Cerebral palsy **23**, 331

Cadaveric; Muscle length; Gastrocnemius; MRI; Human **23**, 112

Center of pressure; Human movement; Posture; Variability; Amplitude; Frequency **23**, 173

Cerebral palsy; Gait analysis; Automated methods; Mutual information; Classification; Feature extraction; Pattern recognition; Data mining; Botulinum Toxin **23**, 331

Cerebral palsy; Gait; Hamstrings; Musculoskeletal model **23**, 273

Cerebral palsy; Visual gait assessment; Hemiplegia **23**, 78

Cerebrovascular accident; Postural control; Balance **23**, 249

Children; Foot; Kinematics; Repeatability **23**, 401

doi:10.1016/S0966-6362(06)00085-3

Children; Walking; Regression; Kinematics; Kinetics **23**, 288

Classification; Gait analysis; Automated methods; Mutual information; Feature extraction; Pattern recognition; Data mining; Cerebral palsy; Botulinum Toxin **23**, 331

Cluttered environments; Older adults; Obstacle course navigation; Locomotion **23**, 486

Compensation function; Metronome; Synchronisation; Phase shift; Asynchrony **23**, 307

Compensation; Weakness; Gait; Quadriceps femoris; Motor control **23**, 435

Computer simulation; Induced acceleration analysis; Modeling; Biomechanics; Coordination; Gait **23**, 37

Coordinate system; Age; 3D; Inverse dynamic **23**, 480

Coordination; Induced acceleration analysis; Computer simulation; Modeling; Biomechanics; Gait **23**, 37

Coordination; Locomotion; Low back pain; Variability; Principal component analysis **23**, 230

Coordination; Locomotion; Relative phase; Limb loading and symmetry **23**, 429

COP − COM; Balance; Fall prevention; Osteoporosis; Postural sway; Stabilography; Stiffness **23**, 51s

CP; Muscle length; Musculoskeletal modeling; Rectus femoris; Duncan Ely **23**, 222

Cross-correlation analysis; Equilibrium control; Posturography; Simulation; Feedback control; PD control **23**, 164

Custom-molded foot orthoses; Muscle activity; Lower extremity; Locomotion; Time-frequency analysis **23**, 295

3D; Age; Coordinate system; Inverse dynamic **23**, 480

Data mining; Gait analysis; Automated methods; Mutual information; Classification; Feature extraction; Pattern recognition; Cerebral palsy; Botulinum Toxin **23**, 331

Data-mining; Gait analysis; Biomechanics; Toe-walking; Fuzzy c-means **23**, 240

Deep brain stimulation; Parkinson's disease; Gait initiation; Subthalamic nucleus **23**, 492

Development; Postural control; Balance; Sensory organization **23**, 455

Diabetes; Peripheral neuropathy; Plantar pressure; Ankle function **23**, 464

Diplegia; Stiffness; Kinematics; Angular velocity; Stretch responses **23**, 1

Direction of progression; Gait; Spatiotemporal; Locomotion; Turning **23**, 159

Down syndrome; Trunk coordination; Treadmill walking; Preadolescents **23**, 512

Duncan Ely; Muscle length; CP; Musculoskeletal modeling; Rectus femoris **23**, 222

Dynamic muscle function; Induced acceleration; Bi-articular muscle function **23**, 211

Dynamic plantar pressure distribution; Partial weight bearing; Fractures of the lower leg; Rehabilitation; Gait analysis **23**, 99

Electromagnetic motion tracking; Foot; Gait analysis; Validity; 1st metatarsophalangeal joint **23**, 391

Elevated Surface; Power; Locomotion; Kinetics; Adaptation **23**, 268

Energy expenditure; Mechanics; Kinematic model; Inverse dynamics; Obesity **23**, 149

Equilibrium control; Posturography; Cross-correlation analysis; Simulation; Feedback control; PD control **23**, 164

Equinus; Gait; Stroke; Ankle plantarflexors; Forward dynamic simulation **23**, 32

Ergonomics; Load carriage; Back pain; Spinal motion; Locomotion; Stature change **23**, 133

Exoskeleton; Locomotion; Gait; Rehabilitation **23**, 425

Fall prevention; Balance; COP − COM; Osteoporosis; Postural sway; Stabilography; Stiffness **23**, 51

Fatigue; Postural strategy; Perturbation; Balance **23**, 348

Feature extraction; Gait analysis; Automated methods; Mutual information; Classification; Pattern recognition; Data mining; Cerebral palsy; Botulinum Toxin **23**, 331

Feedback control; Equilibrium control; Posturography; Cross-correlation analysis; Simulation; PD control **23**, 164

Foot function; Peak pressure; Pressure load; Running; Reference data **23**, 339

Foot; Gait analysis; Electromagnetic motion tracking; Validity; 1st metatarsophalangeal joint **23**, 391

Foot; Kinematics; Children; Repeatability **23**, 401

Foot kinematics; Gait analysis; Foot model; Joint axes; Marker placement; Projection angles **23**, 411

Foot model; Gait analysis; Foot kinematics; Joint axes; Marker placement; Projection angles **23**, 411

Foot-function; Toddler; Gait; Pedobarography **23**, 142

Forward dynamic simulation; Equinus; Gait; Stroke; Ankle plantarflexors **23**, 32

Forward dynamic simulation; Muscle work; Musculoskeletal model; Preferred gait mode **23**, 383

Fractures of the lower leg; Partial weight bearing; Rehabilitation; Gait analysis; Dynamic plantar pressure distribution **23**, 99

Frequency; Human movement; Posture; Center of pressure; Variability; Amplitude **23**, 173

Functional status; Malignant CNS tumours; Gait analysis; Balance **23**, 206

Fuzzy c-means; Gait analysis; Biomechanics; Data-mining; Toe-walking **23**, 240

3D gait analysis; Inverse dynamics; Pressure insoles; Human gait **23**, 189

Gait analysis; Automated methods; Mutual information; Classification; Feature extraction; Pattern recognition; Data mining; Cerebral palsy; Botulinum Toxin **23**, 331

Gait analysis; Biomechanics; Data-mining; Toe-walking; Fuzzy c-means **23**, 240

Gait analysis; Foot; Electromagnetic motion tracking; Validity; 1st metatarsophalangeal joint **23**, 391

Gait analysis; Foot kinematics; Foot model; Joint axes; Marker placement; Projection angles **23**, 411

Gait analysis; Gait improvement surgery; Leg lengthening; Hemiplegia **23**, 83

Gait analysis; Malignant CNS tumours; Functional status; Balance **23**, 206

Gait analysis; Minimally invasive surgery; Hip replacement; Kinematics; Prospective blinded trial **23**, 374

Gait analysis; Partial weight bearing; Fractures of the lower leg; Rehabilitation; Dynamic plantar pressure distribution **23**, 99

Gait analysis; Running; Kinematics; Kinetics; Repeatability **23**, 282

Gait; Biomechanics; Walking; Turning; Kinematics; Kinetics; Limb asymmetries **23**, 106

Gait; Biomedical model; Multi-segment foot; Kinematics; Kinetics; Inverse dynamics; Mediolateral segmentation **23**, 519

Gait; Cerebral palsy; Hamstrings; Musculoskeletal model **23**, 273

Gait; Direction of progression; Spatiotemporal; Locomotion; Turning **23**, 159

Gait; Equinus; Stroke; Ankle plantarflexors; Forward dynamic simulation **23**, 32

Gait; Locomotion; Exoskeleton; Rehabilitation **23**, 425

Gait; Motor control; Muscle function; Instability; Varus **23**, 505

Gait; Obstacles; Joint moments; Lower limb **23**, 69

Gait; Prosthesis; Kinetics; Joint moments; Walking **23**, 303

Gait; Toddler; Foot-function; Pedobarography **23**, 142

Gait; Virtual reality; Gait instability; Treadmill **23**, 441

Gait; Induced acceleration analysis; Computer simulation; Modeling; Biomechanics; Coordination **23**, 37

Gait; Weakness; Quadriceps femoris; Compensation; Motor control **23**, 435

Gait improvement surgery; Gait analysis; Leg lengthening; Hemiplegia **23**, 83

Gait initiation; Parkinson's disease; Deep brain stimulation; Subthalamic nucleus **23**, 492

Gait instability; Virtual reality; Gait; Treadmill **23**, 441

Gastrocnemius; Muscle length; Cadaveric; MRI; Human **23**, 112

Hamstrings; Cerebral palsy; Gait; Musculoskeletal model **23**, 273

Hand segments; Optoelectronic kinematic analysis; Range of movement **23**, 445

Head tilt; Posture; Otolith; Spatial orientation; Vestibulo-spinal **23**, 315

Hemiparesis; Unilateral spatial neglect; Walking; Stroke **23**, 200

Hemiplegia; Gait improvement surgery; Gait analysis; Leg lengthening **23**, 83

Hemiplegia; Visual gait assessment; Cerebral palsy **23**, 78

Hip; Postural control; Osteoarthritis **23**, 45

Hip replacement; Minimally invasive surgery; Gait analysis; Kinematics; Prospective blinded trial **23**, 374

Human gait; Inverse dynamics; Pressure insoles; 3D gait analysis **23**, 189

Human movement; Posture; Center of pressure; Variability; Amplitude; Frequency **23**, 173

Human; Muscle length; Gastrocnemius; Cadaveric; MRI **23**, 112

Human posture; Postural reflexes; Vestibulospinal pathways **23**, 324

Induced acceleration analysis; Computer simulation; Modeling; Biomechanics; Coordination; Gait **23**, 37

Induced acceleration; Dynamic muscle function; Bi-articular muscle function **23**, 211

Instability; Motor control; Gait; Muscle function; Varus **23**, 505

Intersegmental dynamics; Ambulation; Pediatrics; Moments **23**, 499

Inverse dynamic; Age; Coordinate system; 3D **23**, 480

Inverse dynamics; Biomedical model; Gait; Multi-segment foot; Kinematics; Kinetics; Mediolateral segmentation **23**, 519

Inverse dynamics; Mechanics; Kinematic model; Obesity; Energy expenditure **23**, 149

Inverse dynamics; Pressure insoles; 3D gait analysis; Human gait **23**, 189

Joint axes; Gait analysis; Foot kinematics; Foot model; Marker placement; Projection angles **23**, 411

Joint kinematics; Obstructed gait; Lower limb; Locomotion; Age effect **23**, 471

Joint moments; Gait; Obstacles; Lower limb **23**, 69

Joint moments; Gait; Prosthesis; Kinetics; Walking **23**, 303

Joint position sense; Proprioception; Neck; Reliability **23**, 22

Kinematic model; Mechanics; Inverse dynamics; Obesity; Energy expenditure **23**, 149

Kinematics; Biomechanics; Gait; Walking; Turning; Kinetics; Limb asymmetries **23**, 106

Kinematics; Biomedical model; Gait; Multi-segment foot; Kinetics; Inverse dynamics; Mediolateral segmentation **23**, 519

Kinematics; Foot; Children; Repeatability **23**, 401

Kinematics; Gait analysis; Running; Kinetics; Repeatability **23**, 282

Kinematics; Minimally invasive surgery; Hip replacement; Gait analysis; Prospective blinded trial **23**, 374

Kinematics; Shin splints; Stress fractures; Plantar pressure; Alignment **23**, 91

Kinematics; Stiffness; Angular velocity; Stretch responses; Diplegia **23**, 1

Kinematics; Walking; Children; Regression; Kinetics **23**, 288

Kinetics; Biomechanics; Gait; Walking; Turning; Kinematics; Limb asymmetries **23**, 106

Kinetics; Biomedical model; Gait; Multi-segment foot; Kinematics; Inverse dynamics; Mediolateral segmentation **23**, 519

Kinetics; Gait analysis; Running; Kinematics; Repeatability **23**, 282

Kinetics; Gait; Prosthesis; Joint moments; Walking **23**, 303

Kinetics; Power; Locomotion; Elevated Surface; Adaptation **23**, 268

Kinetics; Walking; Children; Regression; Kinematics **23**, 288

Leg lengthening; Gait improvement surgery; Gait analysis; Hemiplegia **23**, 83

Limb asymmetries; Biomechanics; Gait; Walking; Turning; Kinematics; Kinetics **23**, 106

Limb loading and symmetry; Coordination; Locomotion; Relative phase **23**, 429

Load carriage; Ergonomics; Back pain; Spinal motion; Locomotion; Stature change **23**, 133

Locomotion; Coordination; Relative phase; Limb loading and symmetry **23**, 429

Locomotion; Custom-molded foot orthoses; Muscle activity; Lower extremity; Time-frequency analysis **23**, 295

Locomotion; Direction of progression; Gait; Spatiotemporal; Turning **23**, 159

Locomotion; Exoskeleton; Gait; Rehabilitation **23**, 425

Locomotion; Load carriage; Ergonomics; Back pain; Spinal motion; Stature change **23**, 133

Locomotion; Low back pain; Coordination; Variability; Principal component analysis **23**, 230

Locomotion; Obstructed gait; Joint kinematics; Lower limb; Age effect **23**, 471

Locomotion; Older adults; Obstacle course navigation; Cluttered environments **23**, 486

Locomotion; Power; Elevated Surface; Kinetics; Adaptation **23**, 268

Long-term measurements; Pedar Mobile system; Accuracy; Repeatability **23**, 118

Low back pain; Locomotion; Coordination; Variability; Principal component analysis **23**, 230

Lower extremity; Custom-molded foot orthoses; Muscle activity; Locomotion; Time-frequency analysis **23**, 295

Lower limb; Gait; Obstacles; Joint moments **23**, 69

Lower limb; Obstructed gait; Joint kinematics; Locomotion; Age effect **23**, 471

Malignant CNS tumours; Functional status; Gait analysis; Balance **23**, 206

Marker placement; Gait analysis; Foot kinematics; Foot model; Joint axes; Projection angles **23**, 411

Mechanics; Kinematic model; Inverse dynamics; Obesity; Energy expenditure **23**, 149

Posture; Otolith; Spatial orientation; Vestibulo-spinal; Head tilt **23**, 315

Posture; Visual field-dependence; Visual imagery; Motion sickness; Whiplash injury **23**, 355

Posturography; Equilibrium control; Cross-correlation analysis; Simulation; Feedback control; PD control **23**, 164

Power; Locomotion; Elevated Surface; Kinetics; Adaptation **23**, 268

Preadolescents; Trunk coordination; Treadmill walking; Down syndrome **23**, 512

Prediction; Optic flow; Posture; Balance; Postural control **23**, 180

Preferred gait mode; Muscle work; Musculoskeletal model; Forward dynamic simulation **23**, 383

Pressure insoles; Inverse dynamics; 3D gait analysis; Human gait **23**, 189

Pressure load; Peak pressure; Running; Reference data; Foot function **23**, 339

Principal component analysis; Locomotion; Low back pain; Coordination; Variability **23**, 230

Projection angles; Gait analysis; Foot kinematics; Foot model; Joint axes; Marker placement **23**, 411

Proprioception; Joint position sense; Neck; Reliability **23**, 22

Prospective blinded trial; Minimally invasive surgery; Hip replacement; Gait analysis; Kinematics **23**, 374

Prosthesis; Gait; Kinetics; Joint moments; Walking **23**, 303

Quadriceps femoris; Weakness; Gait; Compensation; Motor control **23**, 435

Quiet stance; Neuropathy; Balance; Postural perturbation; Spindle group II afferent fibres **23**, 364

Range of movement; Optoelectronic kinematic analysis; Hand segments **23**, 445

Reaction time; Accidental fall; Musculoskeletal equilibrium; Strength; Biomechanics **23**, 59

Rectus femoris; Muscle length; CP; Musculoskeletal modeling; Duncan Ely **23**, 222

Reference data; Peak pressure; Pressure load; Running; Foot function **23**, 339

Regression; Walking; Children; Kinematics; Kinetics **23**, 288

Rehabilitation; Locomotion; Exoskeleton; Gait **23**, 425

Rehabilitation; Partial weight bearing; Fractures of the lower leg; Gait analysis; Dynamic plantar pressure distribution **23**, 99

Relative phase; Coordination; Locomotion; Limb loading and symmetry **23**, 429

Reliability; Proprioception; Joint position sense; Neck **23**, 22

Repeatability; Foot; Kinematics; Children **23**, 401

Repeatability; Gait analysis; Running; Kinematics; Kinetics **23**, 282

Repeatability; Pedar Mobile system; Accuracy; Long-term measurements **23**, 118

Running; Gait analysis; Kinematics; Kinetics; Repeatability **23**, 282

Running; Peak pressure; Pressure load; Reference data; Foot function **23**, 339

Seesaw; Balance; Posture; Strategy **23**, 17

Sensory organization; Postural control; Balance; Development **23**, 455

Shin splints; Stress fractures; Plantar pressure; Kinematics; Alignment **23**, 91

Simulation; Equilibrium control; Posturography; Cross-correlation analysis; Feedback control; PD control **23**, 164

Spatial orientation; Posture; Otolith; Vestibulo-spinal; Head tilt **23**, 315

Spatiotemporal; Direction of progression; Gait; Locomotion; Turning **23**, 159

Spinal motion; Load carriage; Ergonomics; Back pain; Locomotion; Stature change **23**, 133

Spindle group II afferent fibres; Neuropathy; Balance; Quiet stance; Postural perturbation **23**, 364

Stabilography; Balance; COP − COM; Fall prevention; Osteoporosis; Postural sway; Stiffness **23**, 51

Stature change; Load carriage; Ergonomics; Back pain; Spinal motion; Locomotion **23**, 133

Stiffness; Balance; COP − COM; Fall prevention; Osteoporosis; Postural sway; Stabilography **23**, 51

Stiffness; Kinematics; Angular velocity; Stretch responses; Diplegia **23**, 1

Strategy; Balance; Seesaw; Posture **23**, 17

Strength; Accidental fall; Musculoskeletal equilibrium; Reaction time; Biomechanics **23**, 59

Stress fractures; Shin splints; Plantar pressure; Kinematics; Alignment **23**, 91

Stretch responses; Stiffness; Kinematics; Angular velocity; Diplegia **23**, 1

Stroke; Equinus; Gait; Ankle plantarflexors; Forward dynamic simulation **23**, 32

Stroke; Unilateral spatial neglect; Walking; Hemiparesis **23**, 200

Subthalamic nucleus; Parkinson's disease; Gait initiation; Deep brain stimulation **23**, 492

Synchronisation; Metronome [illegible]se shift; Asynchrony; Compensation function **23**, 307

Test phase; Balancing task; Motor learning **23**, 9

Time-frequency analysis; Custom-molded foot orthoses; Muscle activity; Lower extremity; Locomotion **23**, 295

Toddler; Gait; Foot-function; Pedobarography **23**, 142

Toe-walking; Gait analysis; Biomechanics; Data-mining; Fuzzy c-means **23**, 240

Treadmill; Virtual reality; Gait; Gait instability **23**, 441

Treadmill walking; Trunk coordination; Preadolescents; Down syndrome **23**, 512

Trunk coordination; Treadmill walking; Preadolescents; Down syndrome **23**, 512

Turning; Biomechanics; Gait; Walking; Kinematics; Kinetics; Limb asymmetries **23**, 106

Turning; Direction of progression; Gait; Spatiotemporal; Locomotion **23**, 159

Unilateral spatial neglect; Walking; Hemiparesis; Stroke **23**, 200

Validity; Foot; Gait analysis; Electromagnetic motion tracking; 1st metatarsophalangeal joint **23**, 391

Variability; Human movement; Posture; Center of pressure; Amplitude; Frequency **23**, 173

Variability; Locomotion; Low back pain; Coordination; Principal component analysis **23**, 230

Varus; Motor control; Gait; Muscle function; Instability **23**, 505

Vestibulospinal pathways; Human posture; Postural reflexes **23**, 324

Vestibulo-spinal; Posture; Otolith; Spatial orientation; Head tilt **23**, 315

VICON gait analysis system; Postural changes; Pelvic motion **23**, 263

Virtual reality; Gait; Gait instability; Treadmill **23**, 441

Visual field-dependence; Posture; Visual imagery; Motion sickness; Whiplash injury **23**, 355

Visual gait assessment; Hemiplegia; Cerebral palsy **23**, 78

Visual imagery; Posture; Visual field-dependence; Motion sickness; Whiplash injury **23**, 355

Walking; Biomechanics; Gait; Turning; Kinematics; Kinetics; Limb asymmetries **23**, 106

Walking; Children; Regression; Kinematics; Kinetics **23**, 288

Walking; Gait; Prosthesis; Kinetics; Joint moments **23**, 303

Walking; Unilateral spatial neglect; Hemiparesis; Stroke **23**, 200

Weakness; Gait; Quadriceps femoris; Compensation; Motor control **23**, 435

Whiplash injury; Posture; Visual field-dependence; Visual imagery; Motion sickness **23**, 355
